Office Action Summary	Application No. 10/563,403	Applicant(s) GAHLER ET AL.	
	Examiner Mark Hellner	Art Unit 3663	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8 and 10-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Glasenhardt et al (EP 1069542).

Glasenhardt et al disclose a control device comprising: one or more modules (9) stored within the memory of the control device; an interface (wireless link between 11 and 1) for activating software modules or components of a software module by way of an external device (S), wherein the interface communicates with the one of more modules in a wireless manner by means of a telemetric device.

The structure recited above teaches claim 8.

Claim 10 is taught by elements 6 and 7.

Claim 11 is taught by element 10.

Claims 12 and 13 are taught by elements 1, K, 3 and 4.

Claims 14 to 16 are taught by the structure applied to claims 8 and 10 to 13.

Claim 17 is taught by the PC.

Claim 18 is taught by the abstract.

Claim Rejections - 35 USC § 103

Art Unit: 3663

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Glasenhardt et al (EP 1069542).

Glasenhardt et al teaches that their data be transmitted to a cell phone link. As a result, it would have been logical for the skilled artisan to have used a secure protocol in order to prevent unauthorized use, thus rendering claim 9 obvious.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited show the level of skill in the art.
